

Requirement Elicitation

Isha Devgan, Stuti Shah, Anushka Trivedi, Michael Kopczynski

Fall 2024

1 Requirements Elicitation Method

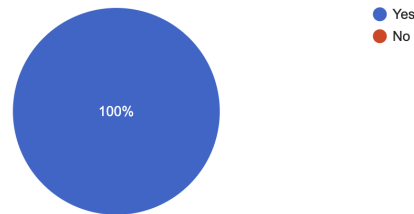

For requirements elicitation purposes, we asked 8 Computer Science students (2 groups in the CS 3704 class) to complete our survey to gain insight on what they thought of our PomBot productivity tool.

2 Question 1

Would you use this?: We asked a group of fellow software developers from Virginia Tech through a survey if they would use our Pomodoro bot and everyone

Would you use this?

9 responses

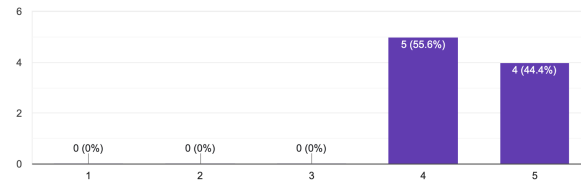

asked said yes.

3 Question 2

How helpful would this be?: The group of software developers were all asked to rate helpfulness from a scale of 1-5, where most of them rated it a 4 and a couple rated it a 5.

How helpful would this be?

9 responses

4 Question 3

What are your requirements for the Pomodoro bot?: Some of the requirements people listed down were: options to extend break/study times if necessary, a notifier that gives notification once the task changes, able to select the task you want to work on, easy rescheduling, skip breaks when needed/wanted, UI to view timers, customized view, block any distractions while the bot is on and customized sounds.
